More than a table. A system.

Universal, versatile, suitable for any use, it changes thanks to the many possible configurations. At the base of FORK, the new table designed by Tomoya Tabuchi for lapalma, is the concept of "leg system", which provides the ability to expand, potentially indefinitely, many versions of a table. It can be used in the office or in other areas: alone in its larger variants, or grouped, in compositions. Inspired by the branches of a tree, which adapt to the environment, or to the flow of a river that runs along its banks, the leg system developed for FORK provides some common parts in die-cast aluminum: a structure that allows varying the configuration, playing on different finishes of legs or columns. FORK includes an entire family of tables, in different materials, alone or combined with each other, with different heights, shapes and finishes, both for the top and for the legs. Functional and intended for further developments and extensions, FORK is designed for the "light office", increasingly characterizing workspaces and "open" domestic environments, but also contract spaces intended for multiple and differentiated uses.

Table with base composed of aluminium drawn tube with elliptical section and connection in die-cast aluminium powder coated. Legs veneered in wood or powder coated with adjustable feet in nylon.

frame		top	
	powder coated: black		black open pore
	laminated Fenix 0,9 black		oak dark walnut
	powder coated: white		laminated Fenix 0,9 white
	blanched oak		black open pore
			blanched oak
			white lacquered

use and maintenance instructions

Clean all parts in wood, leather, fabric and metal with a damp cloth or a diluted neutral cleaner. Do not use cleaners with alcohol, bleach, solvent or abrasive products. Any liquid spill on the product must be wiped up immediately. When lifting or moving the product, hold it on the structure and not under the seat. The product should not be subjected to unbalanced weights, as it is designed for a proper rest on the foothold (on four legs or on the base). Our company relieves from any responsibility in case of damage caused to fragile floors. Avoid any improper use of the product: do not step on the product, on the footrest or on the armrests. Avoid any movements that could compromise the proper functionality of the product or the safety of the users. Wood and leather, being natural materials, could be easily damaged. Small impurities or imperfections are within quality standard range. Do not expose the product to weather conditions or atmospheric agents, nor to heat sources over 40°C. Also products for outdoor use could be afflicted by atmospheric agents. The product could undergo possible exterior changes due to particular exposure to heat, humidity and saltiness. An appropriate and frequent maintenance and cleaning of the product enhances its durability. The product could change colour and shade, if exposed to direct sunlight. Maintenance has to be carried out by experienced staff. Dispose of the package only after assembling the product, in order to avoid the loss of ironmongery and components. Once the product has been dismantled, the product itself or its components must be given to the public garbage disposal system, according to the legislation in force.
