twin

The first plastic chair
for contract use

The twins

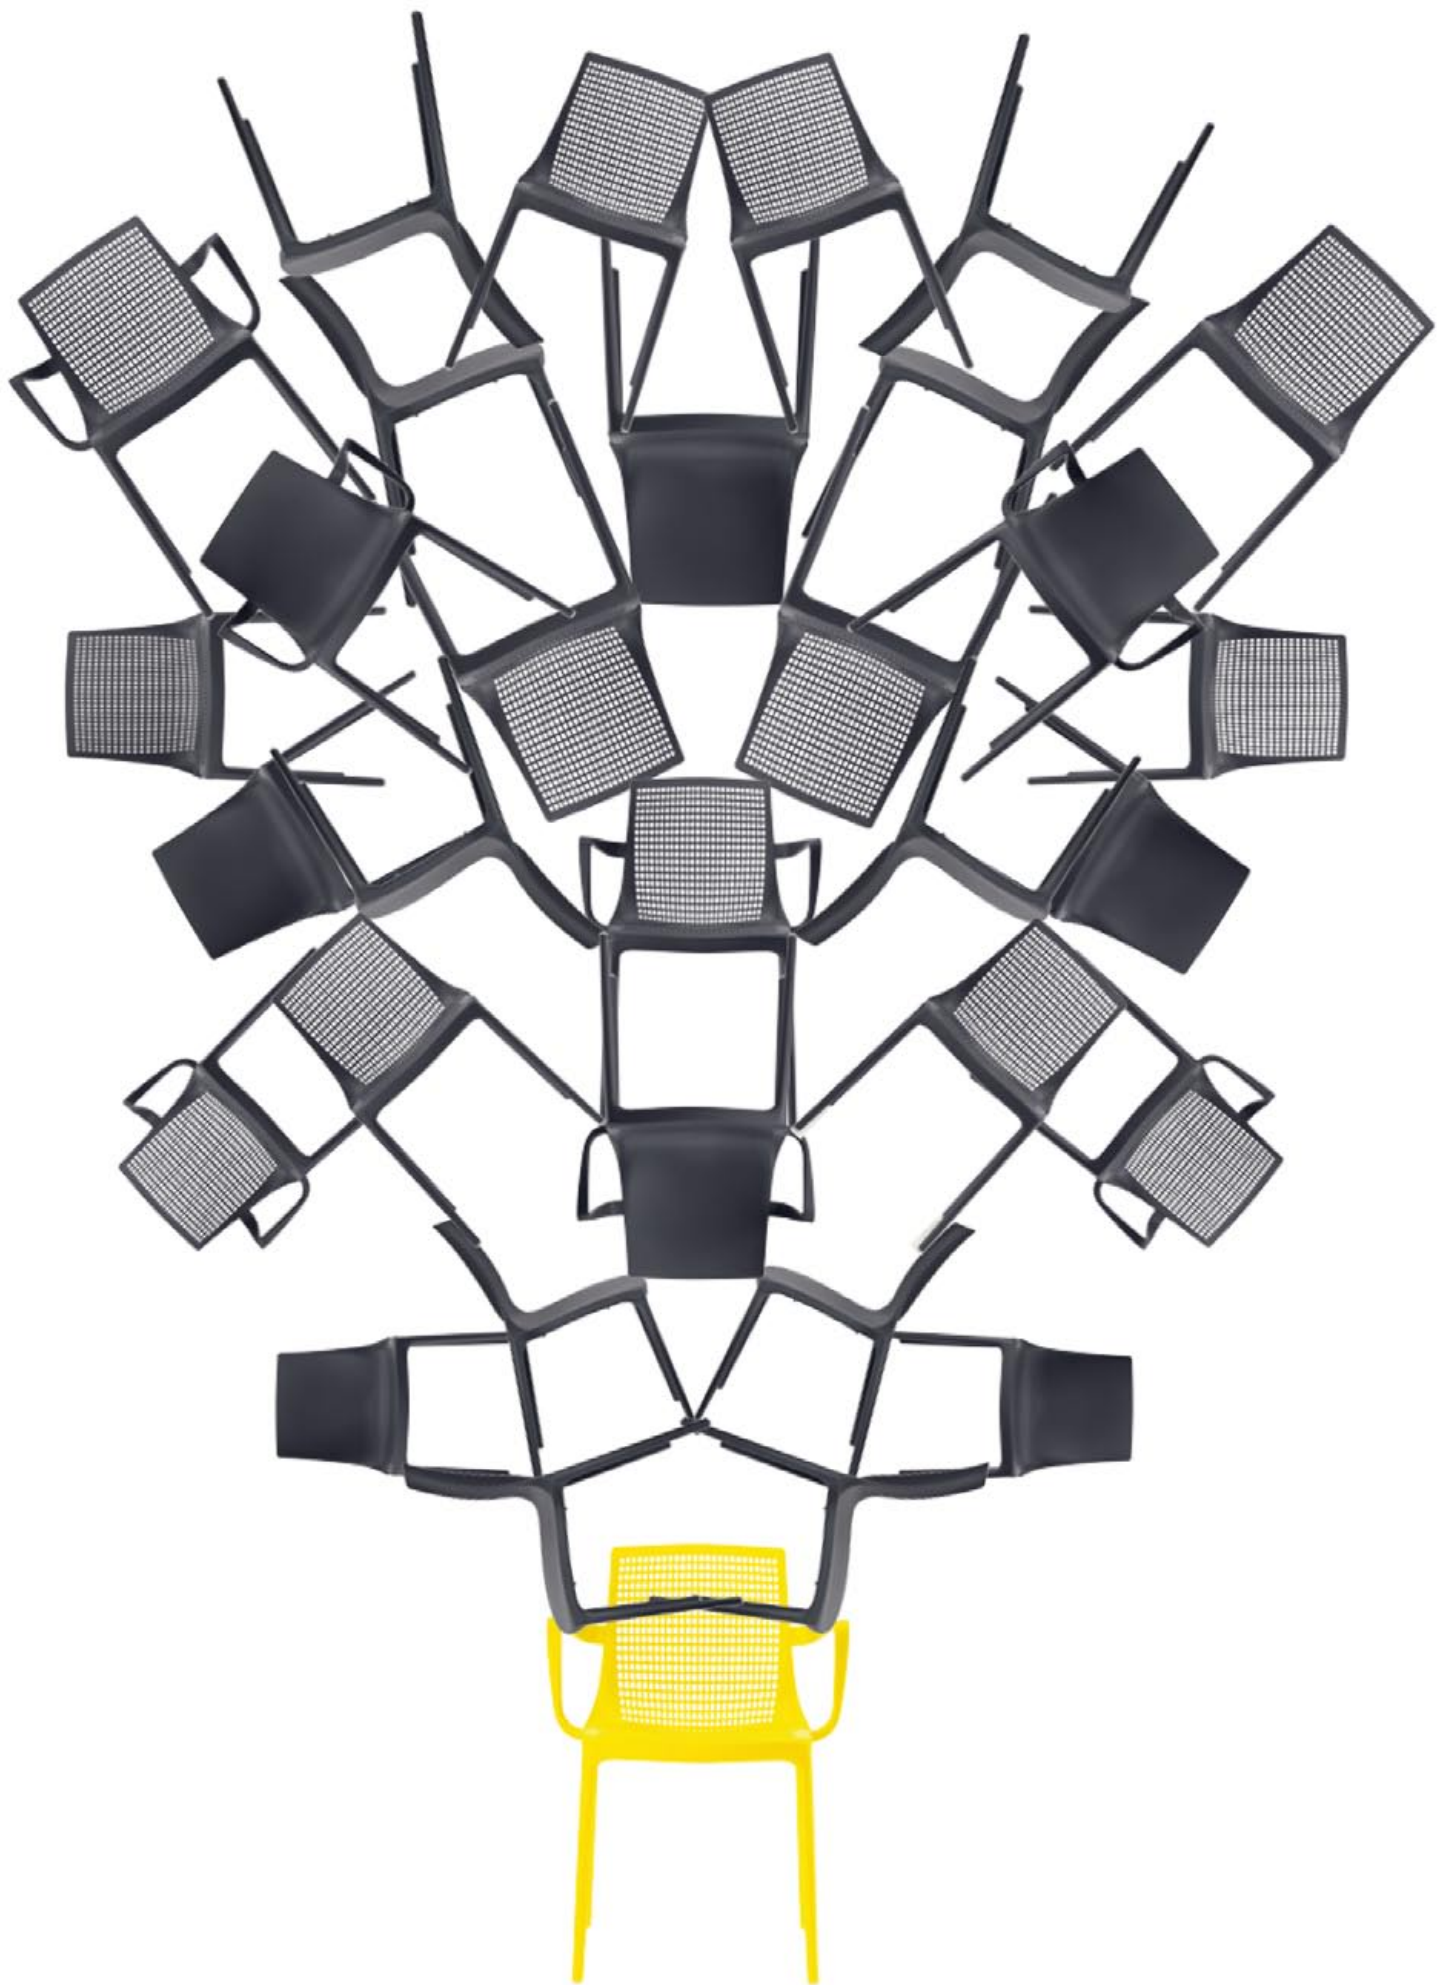

Choose a design with or without the transparent net structure.

Getting back to basics with a monobloc design – the twin, our new plastic chair. Sturdy, low-maintenance and colourful. The intensive collaboration of the Italian design studio Archirivolto, the toolmakers and the Brunner development team has produced this well rounded, multipurpose piece. Thanks to its weatherproof material (glass fibre-reinforced polypropylene), this chair is a superb addition to any public place or outdoor area of cafes and restaurants. Boasting high standards in terms of hygiene, the twin is ideal for care facilities and hospitals.

Sturdy

Despite its lightweight, delicate appearance, the twin is very sturdy and able to withstand extreme loads. This has been made possible by the glass fibre-reinforced material and a design that puts a priority on function.

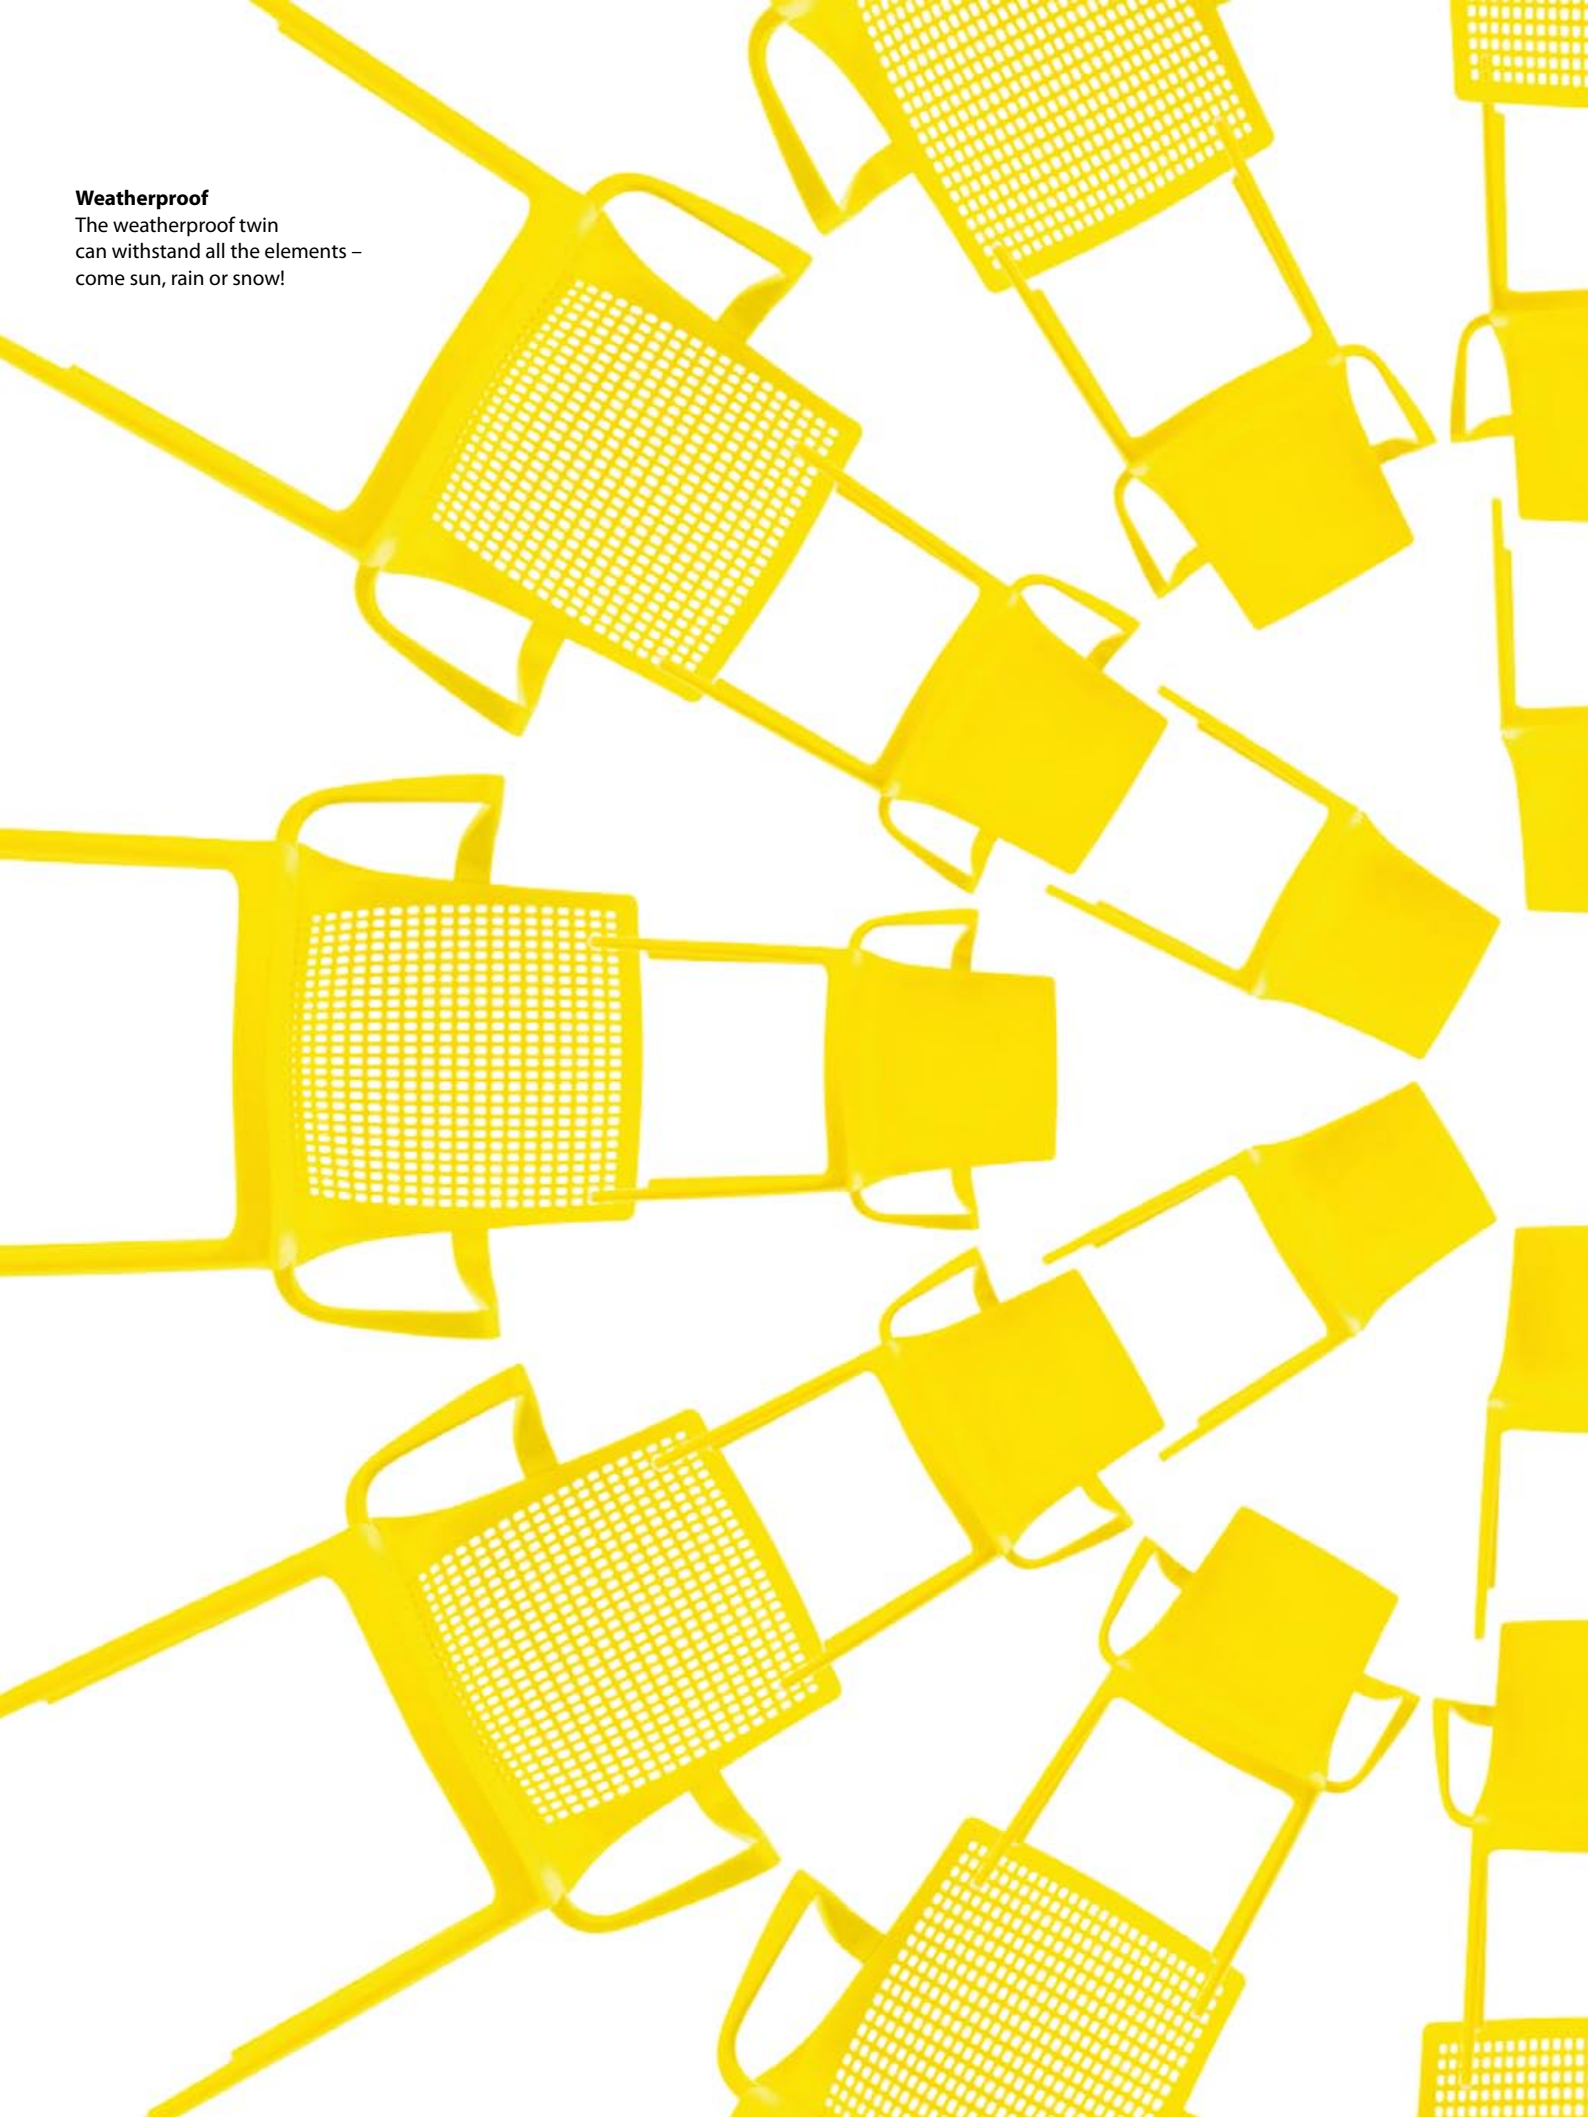

Stackable

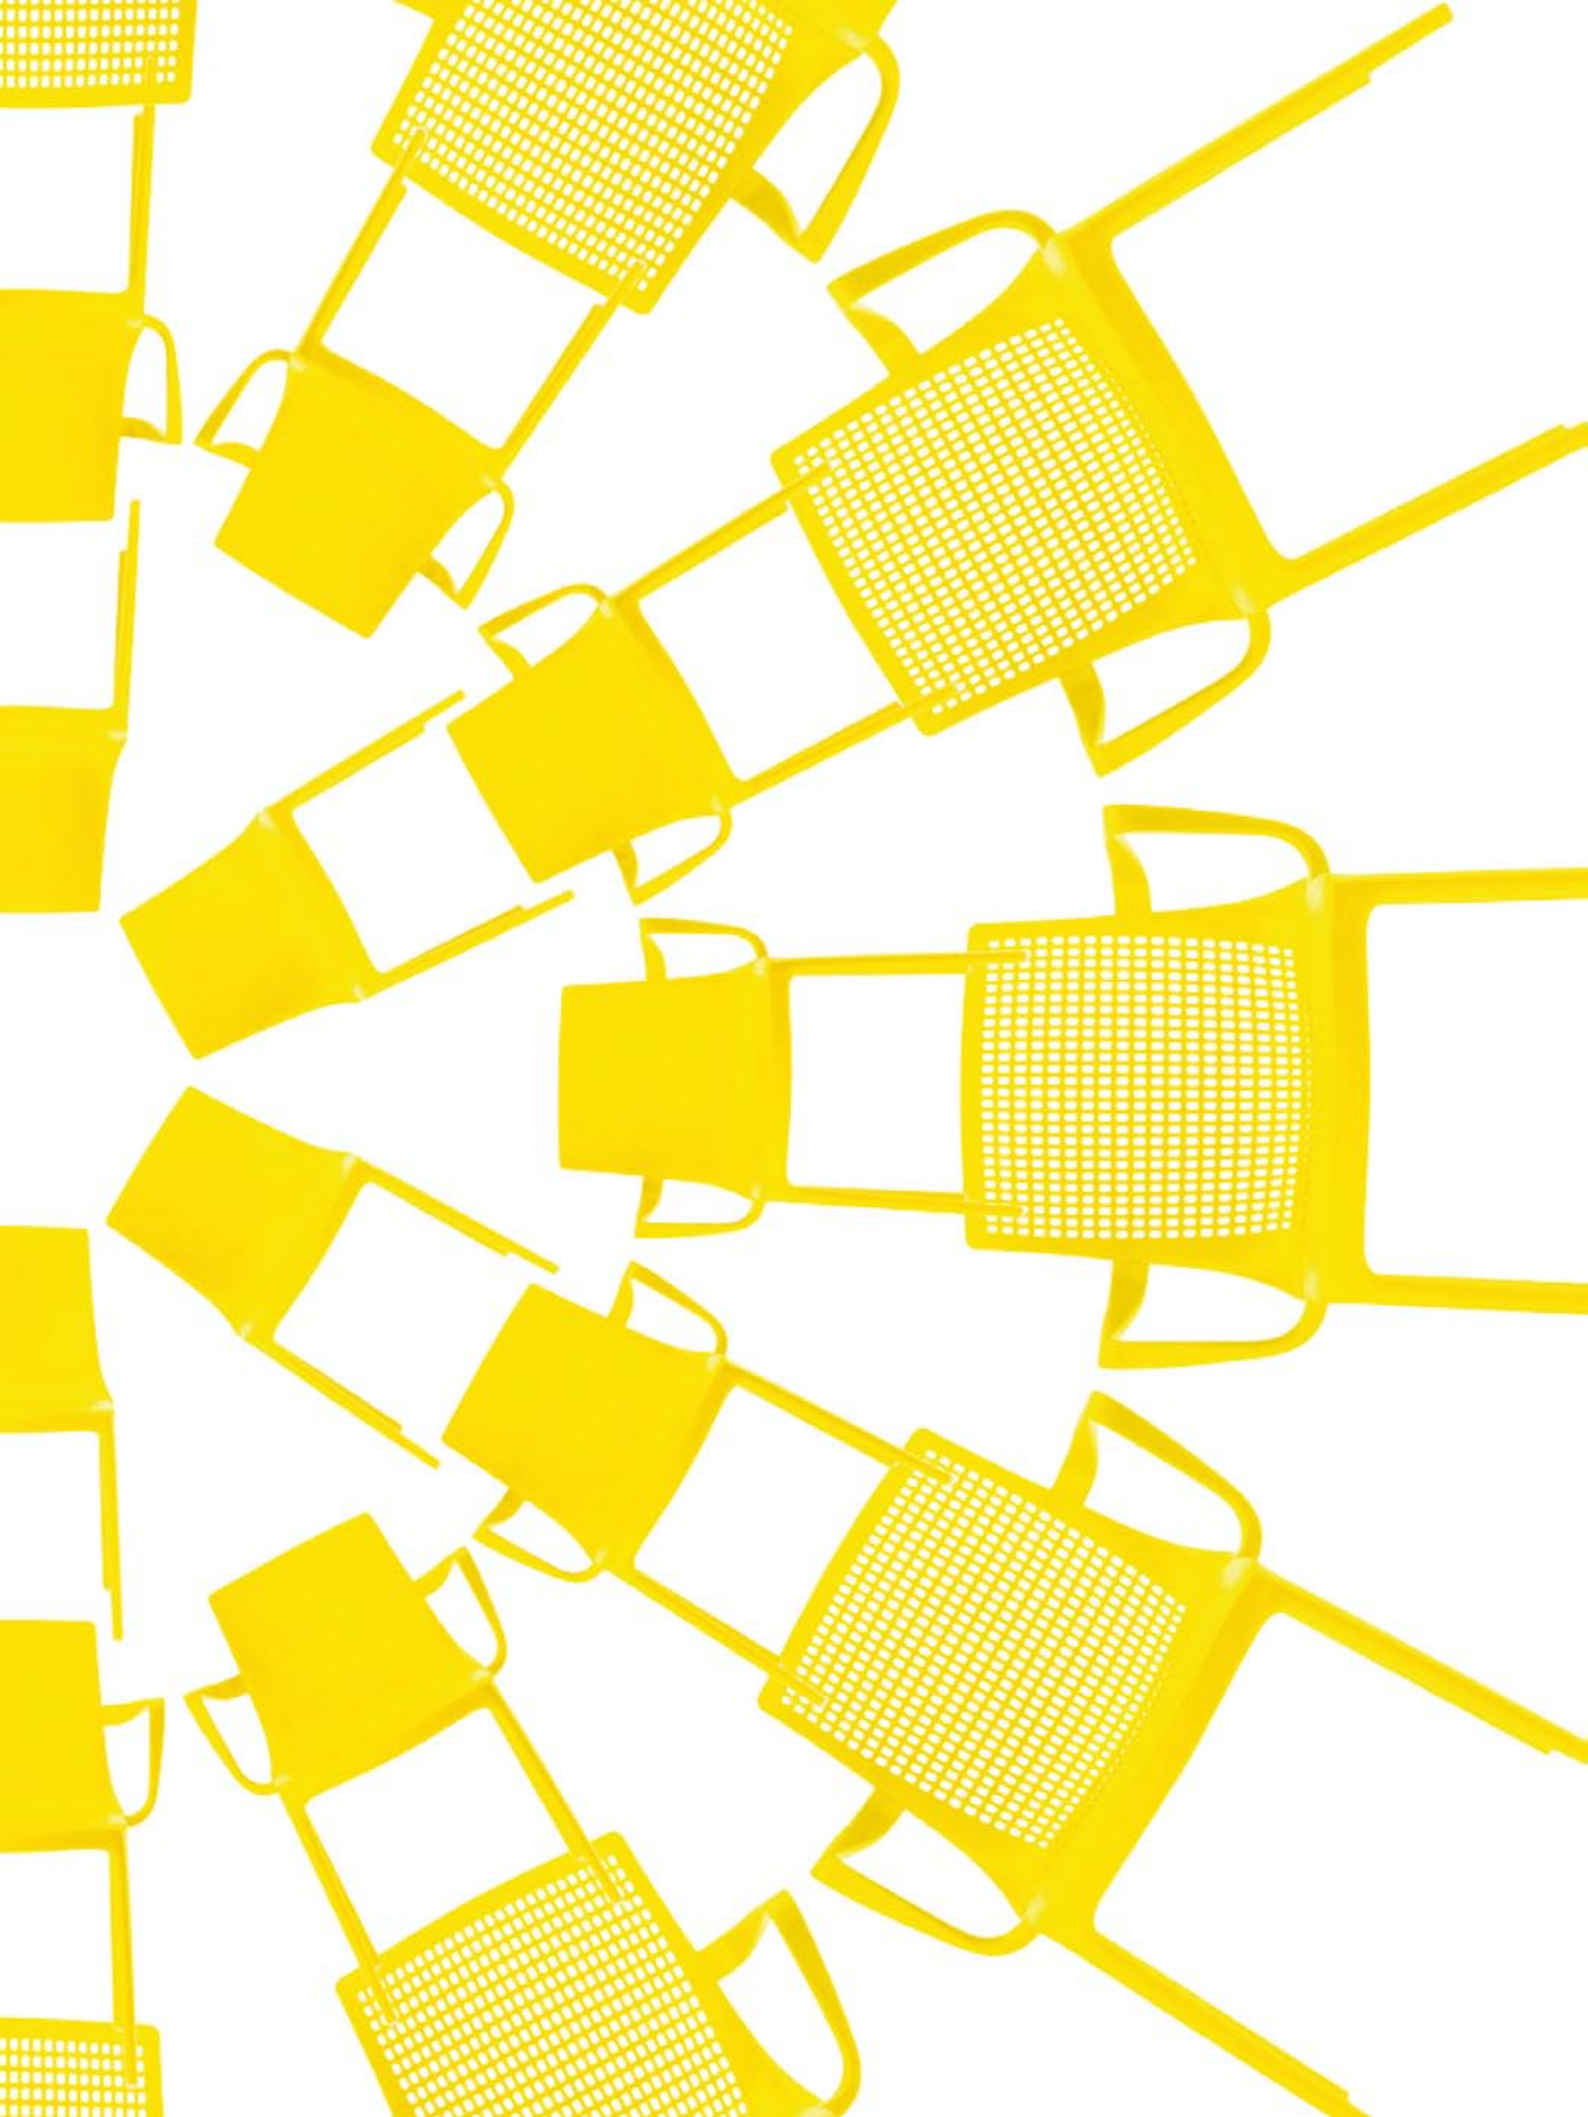

Up to five twins can be stacked on top of one another. A combination of the different designs, with or without armrests, is also possible.

Weatherproof

The weatherproof twin
can withstand all the elements –
come sun, rain or snow!

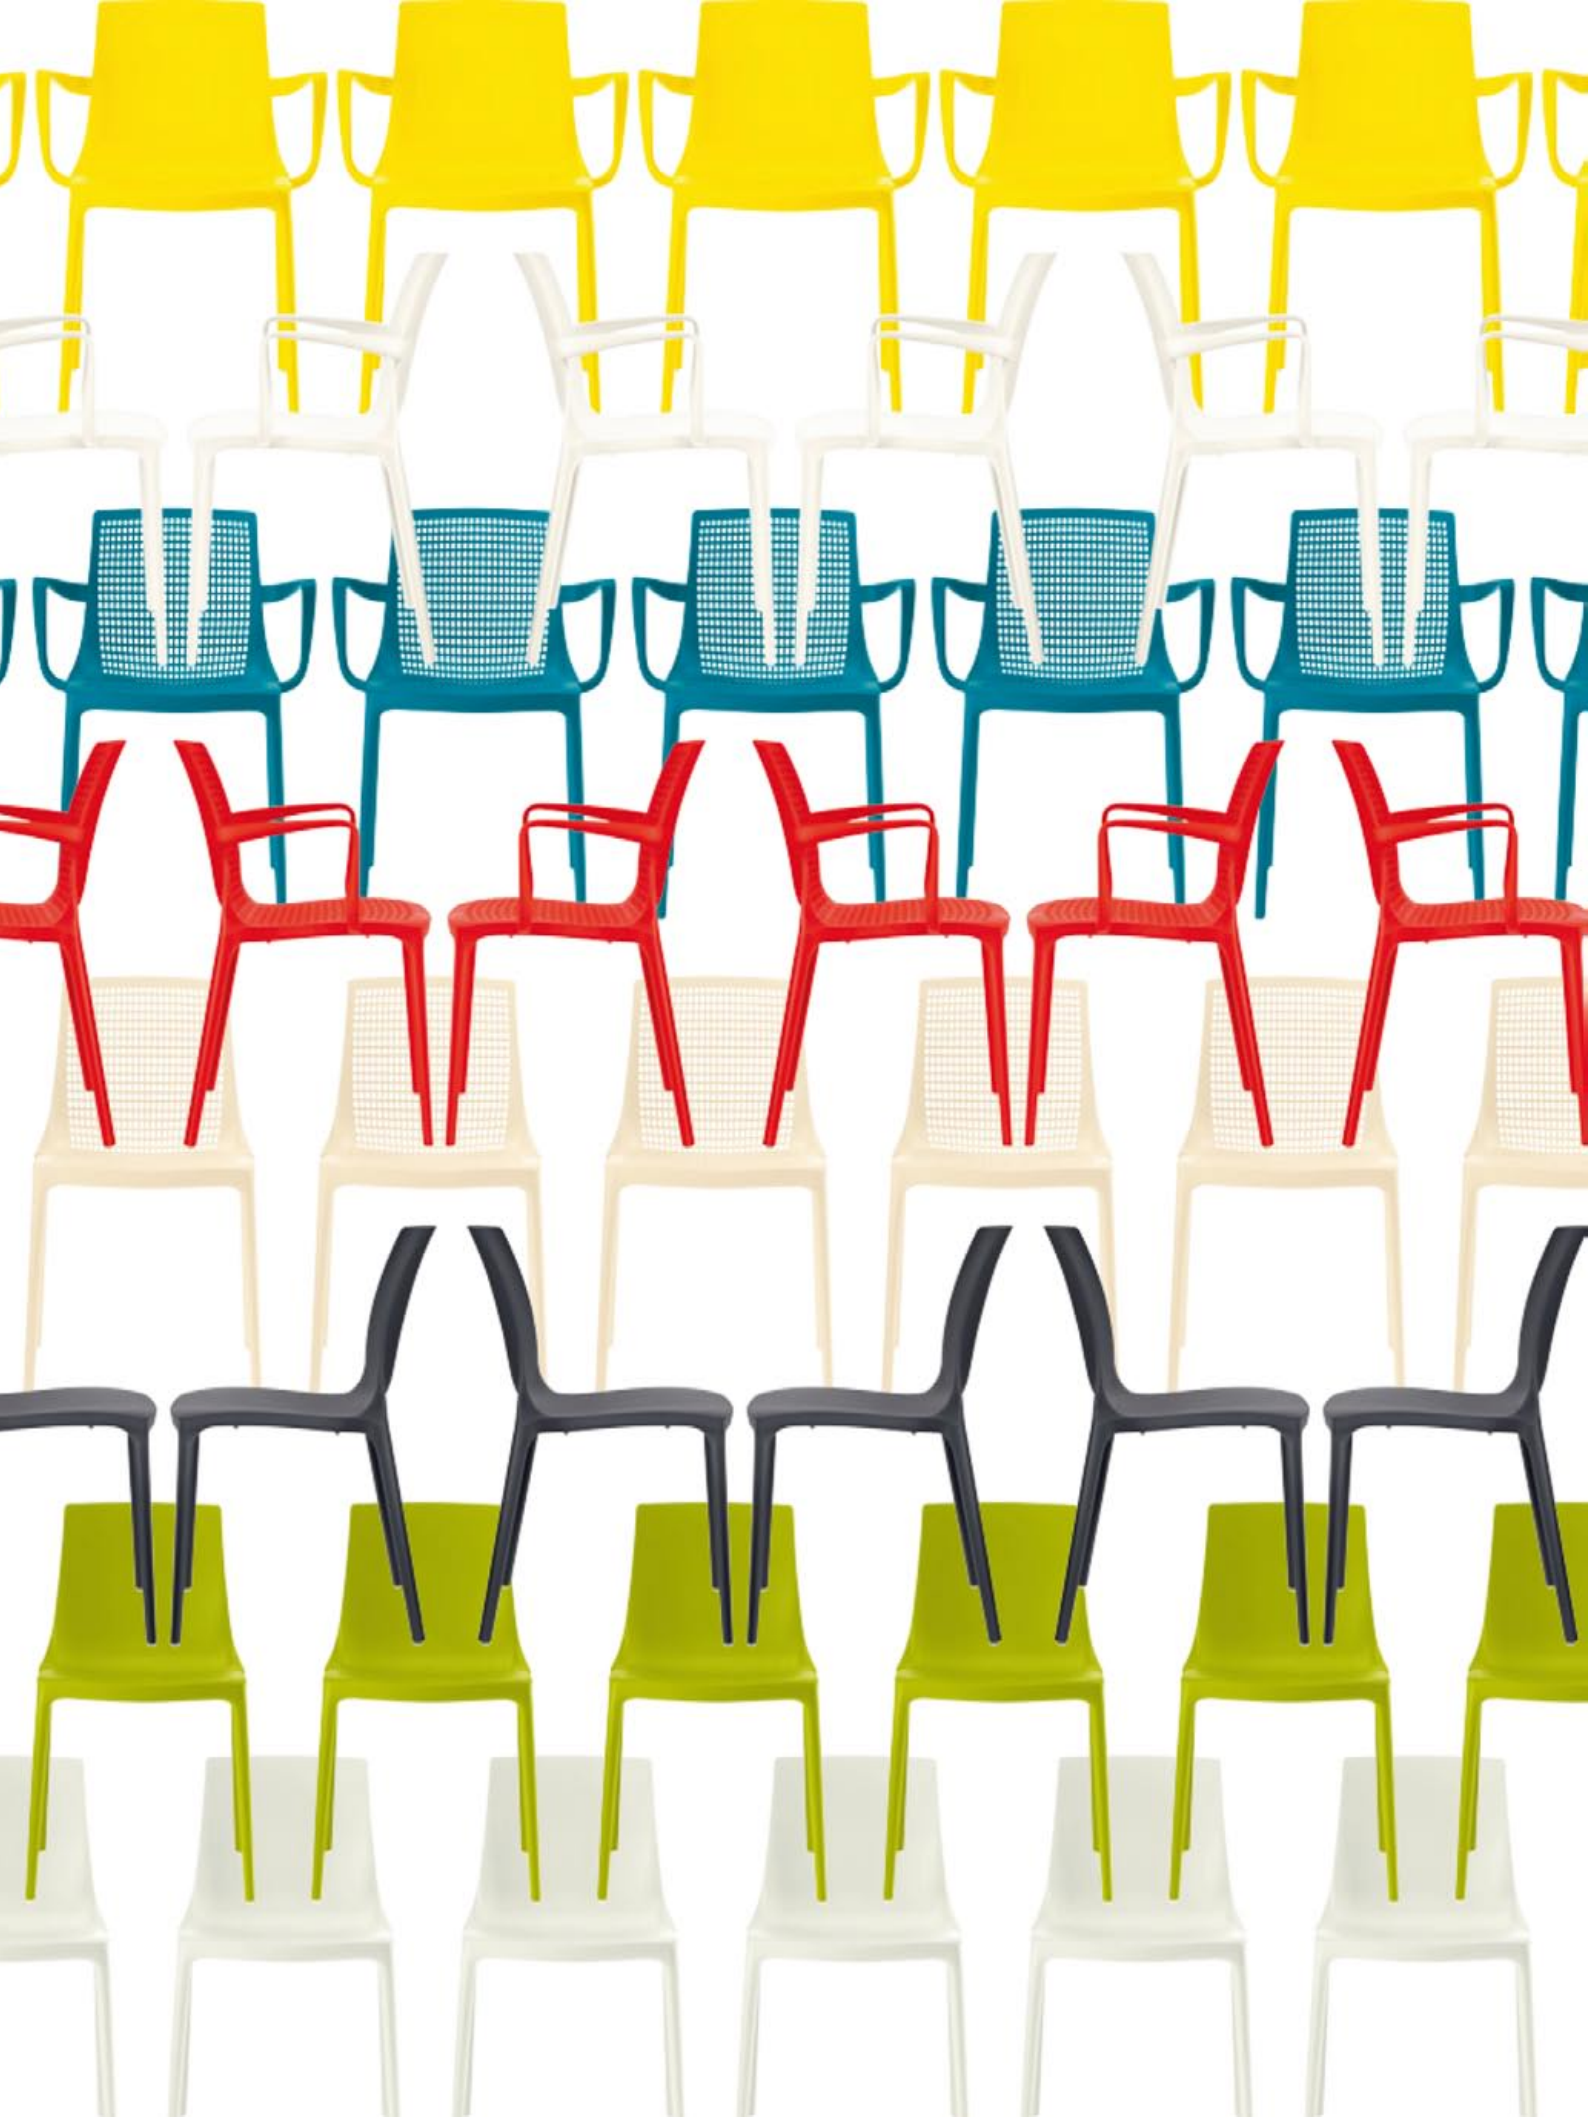

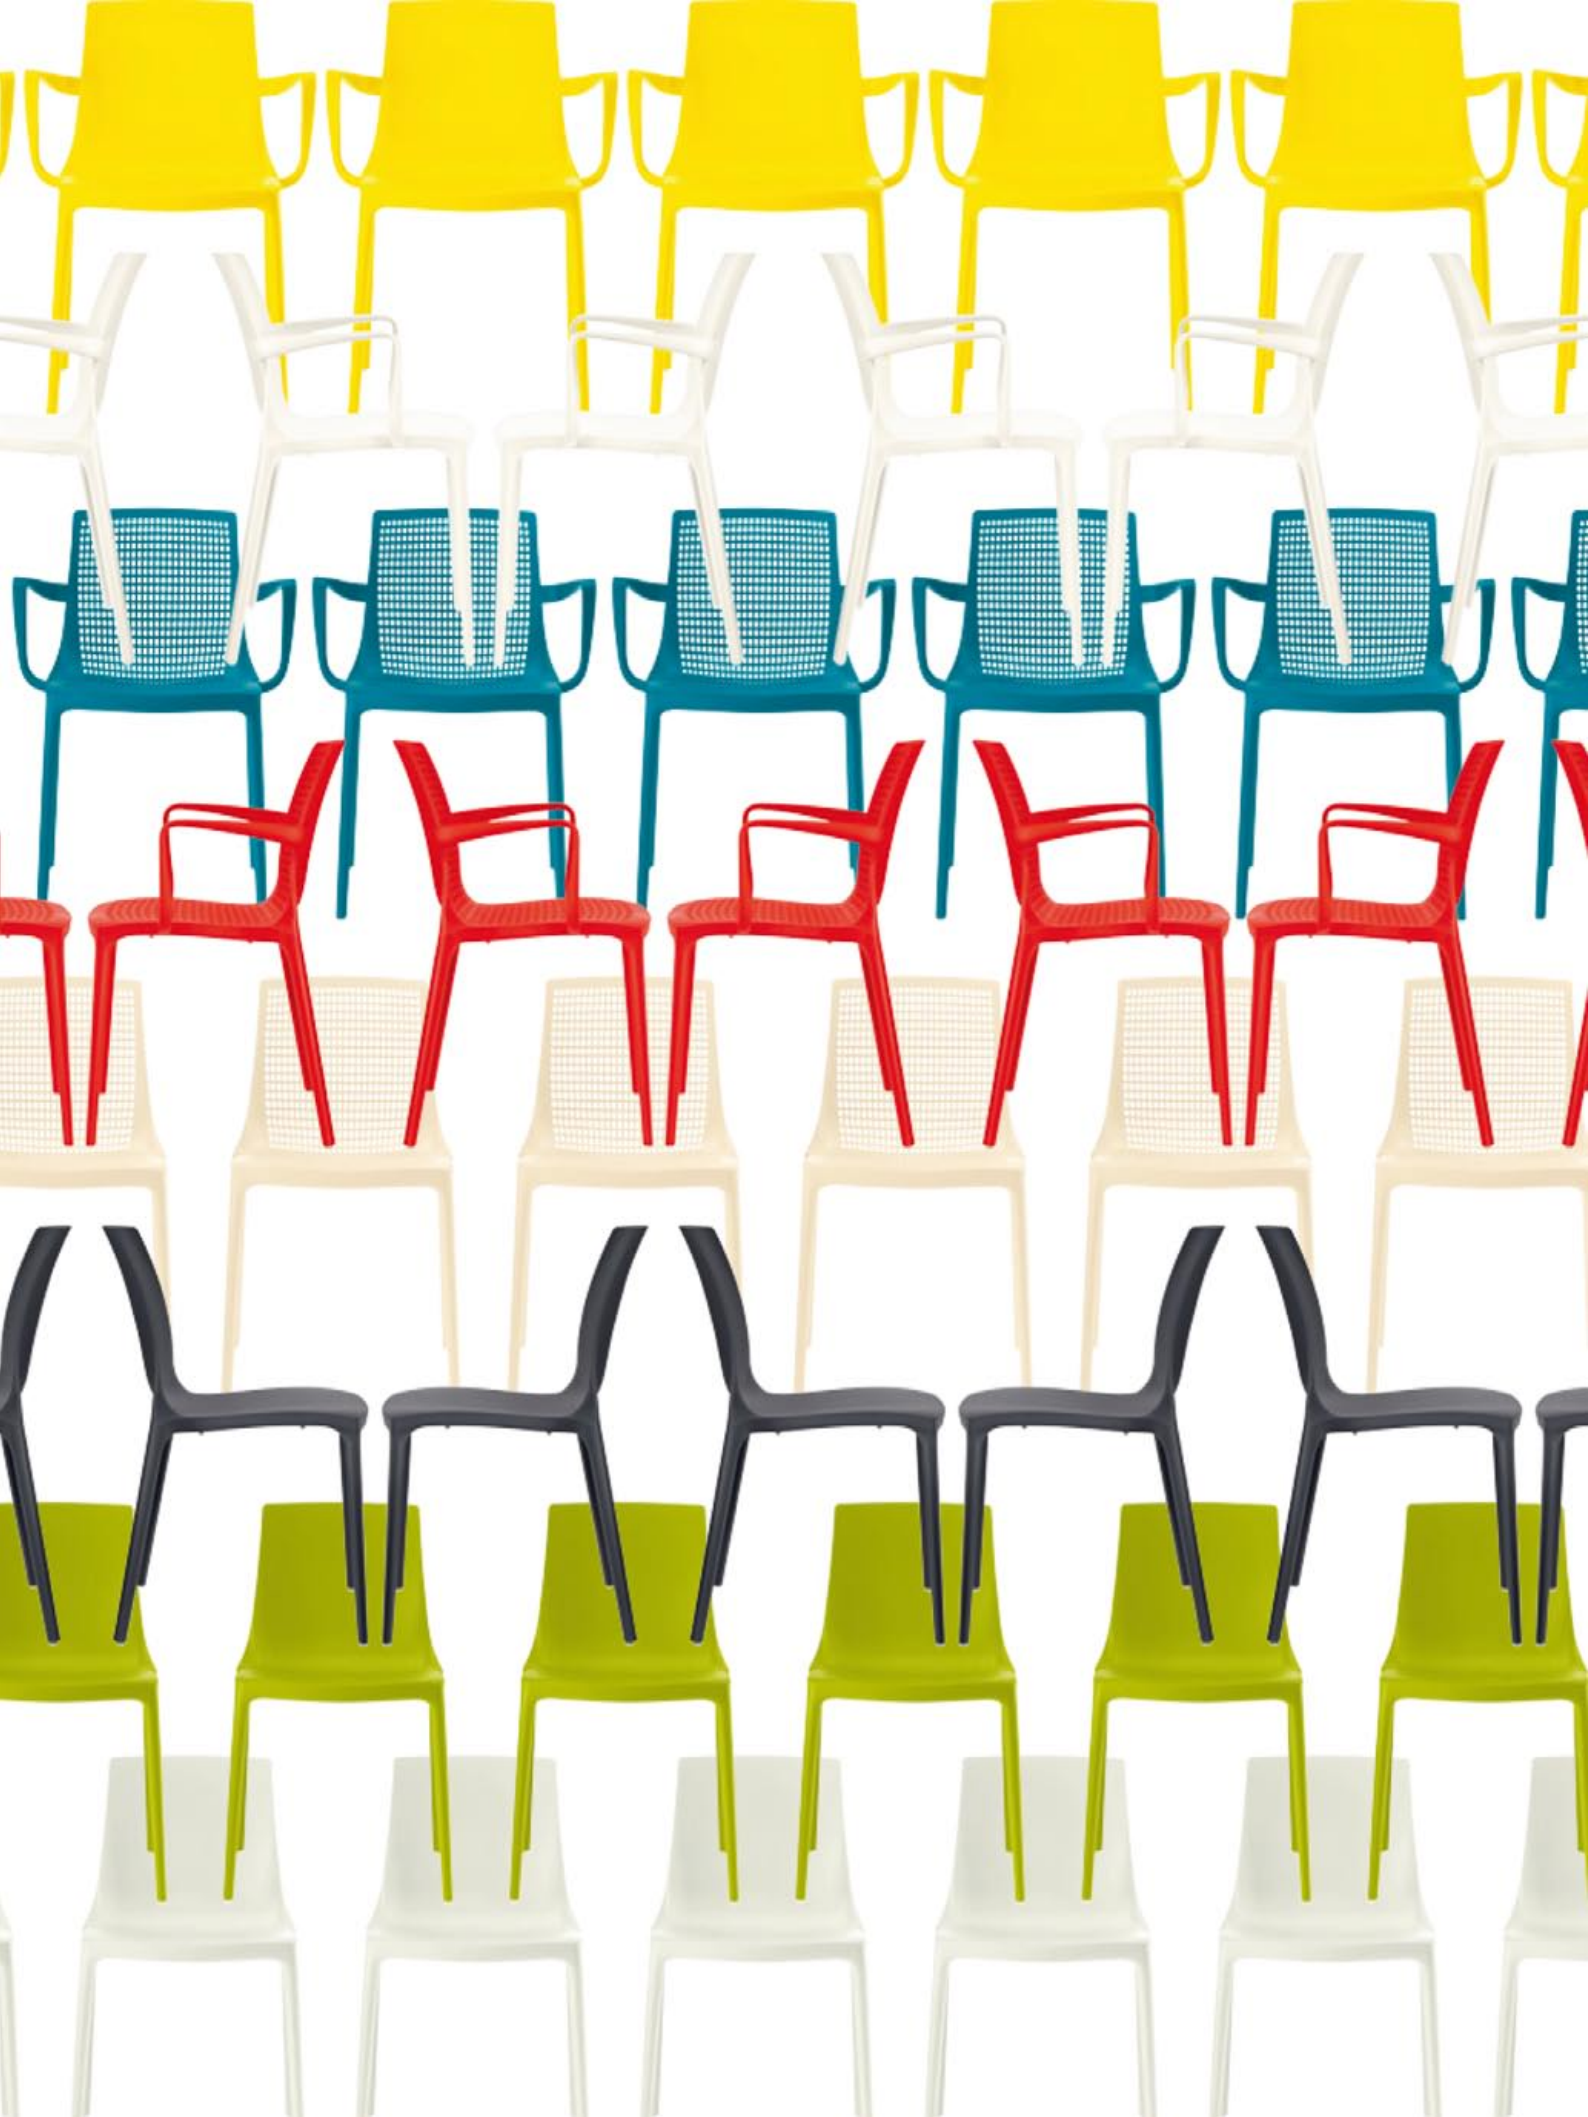

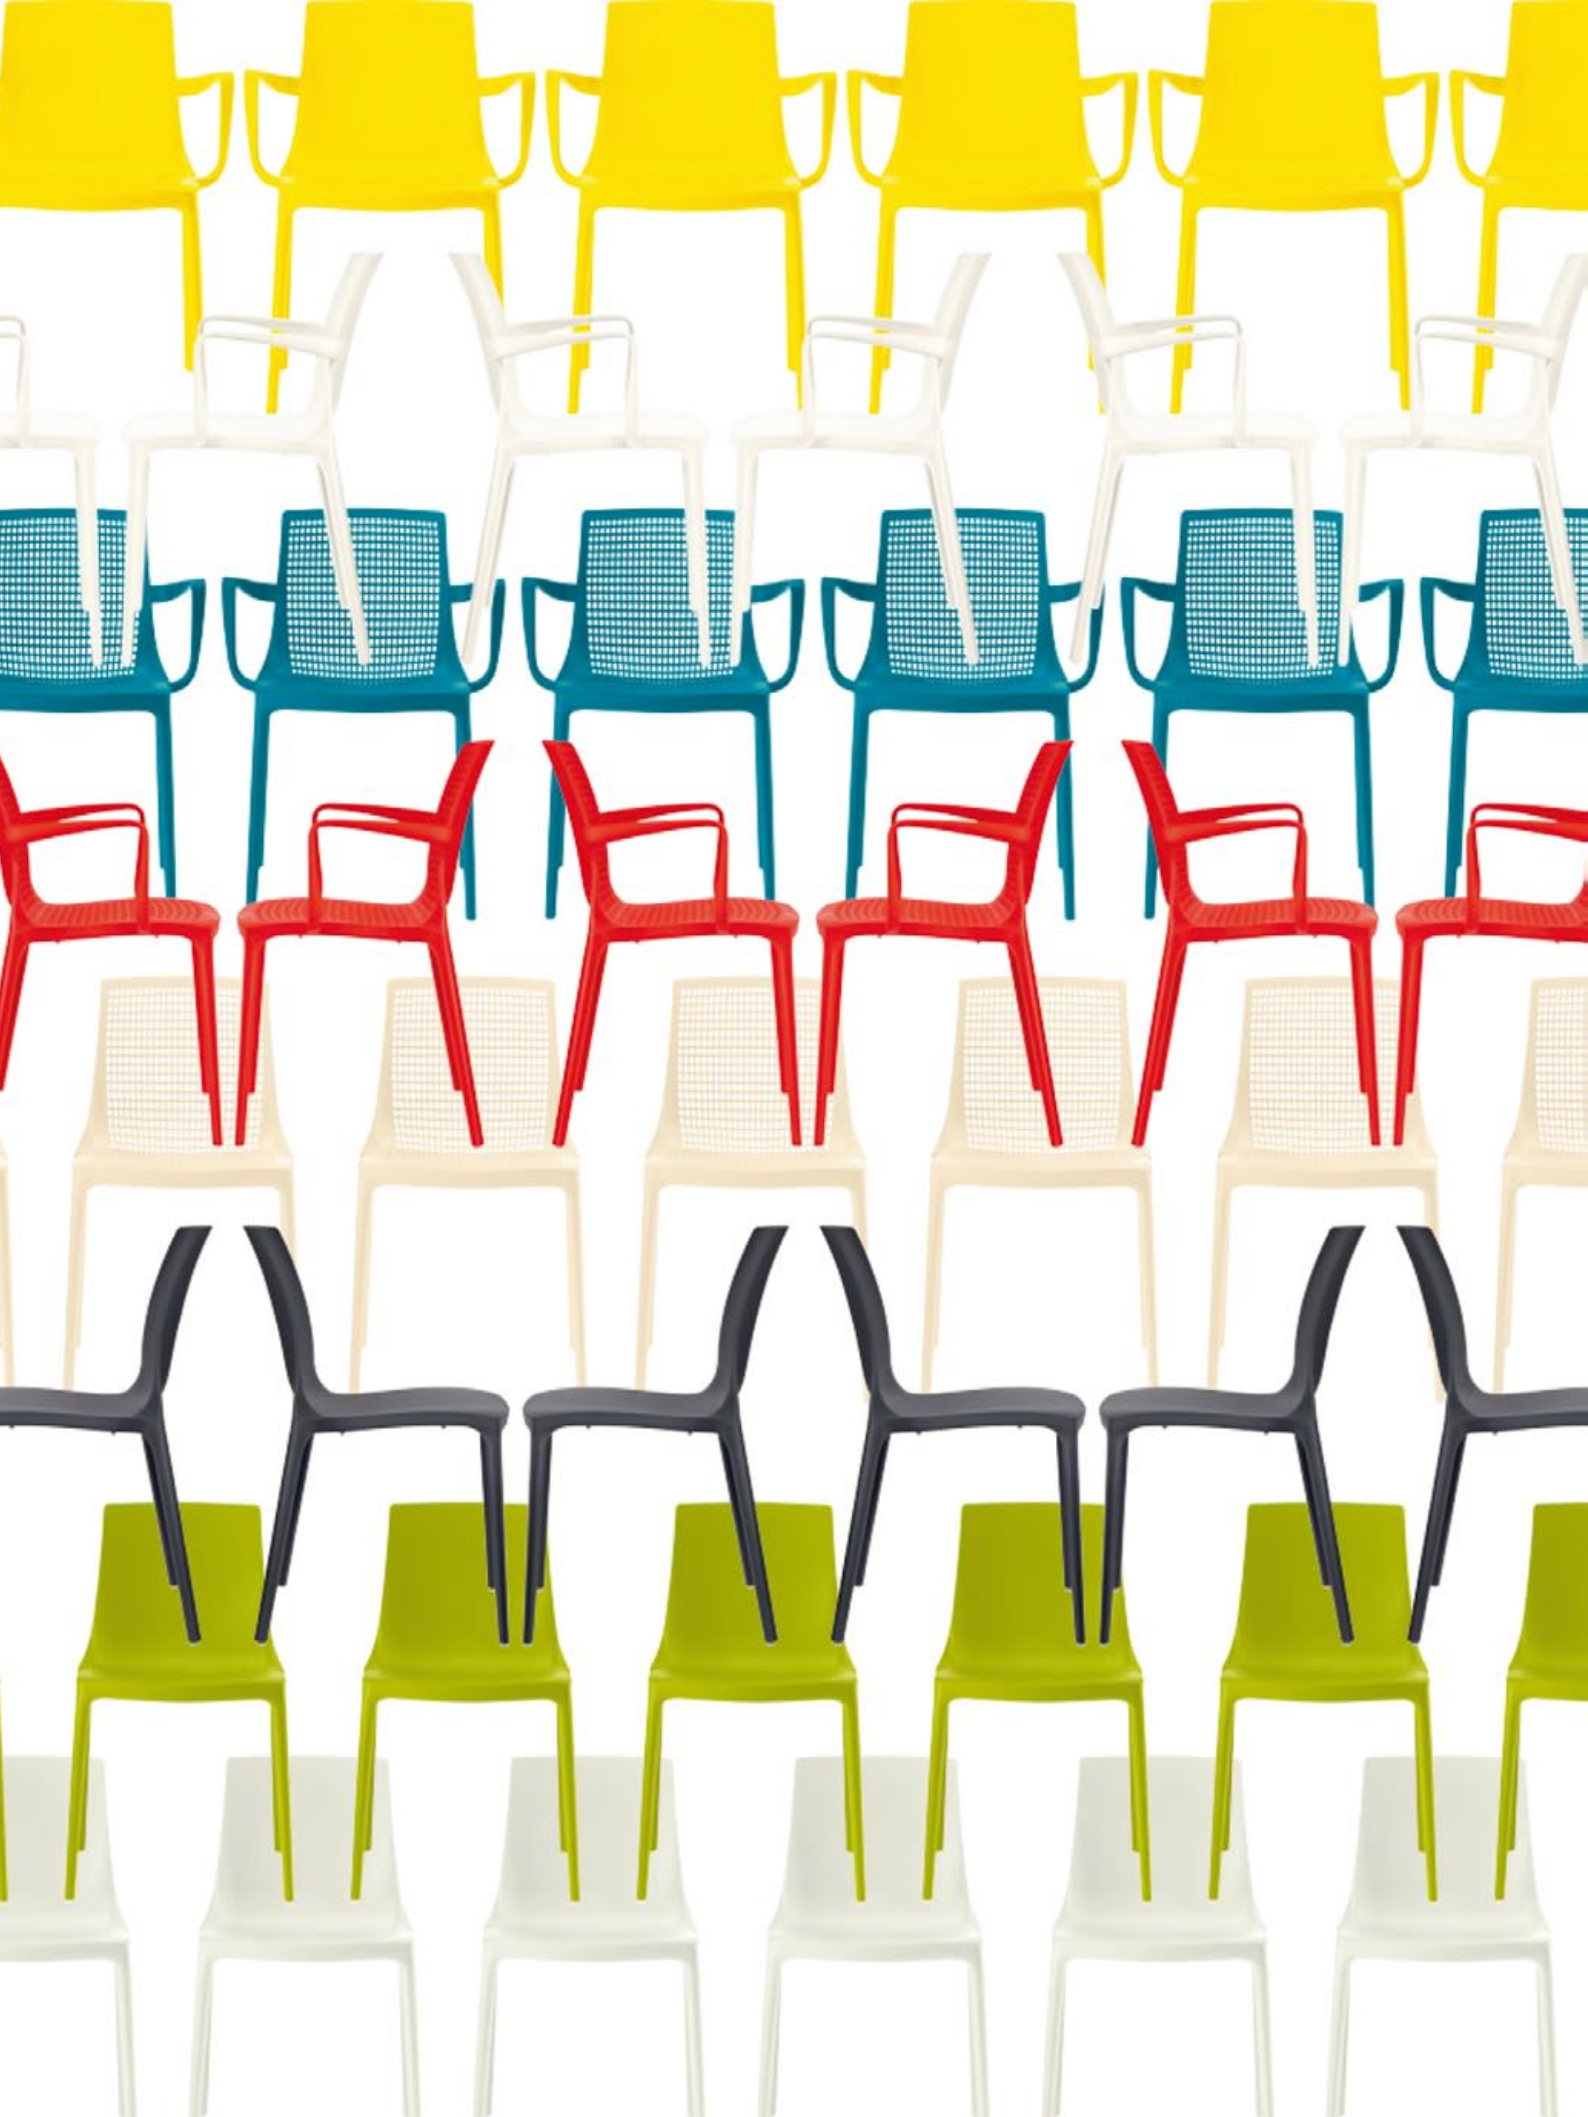

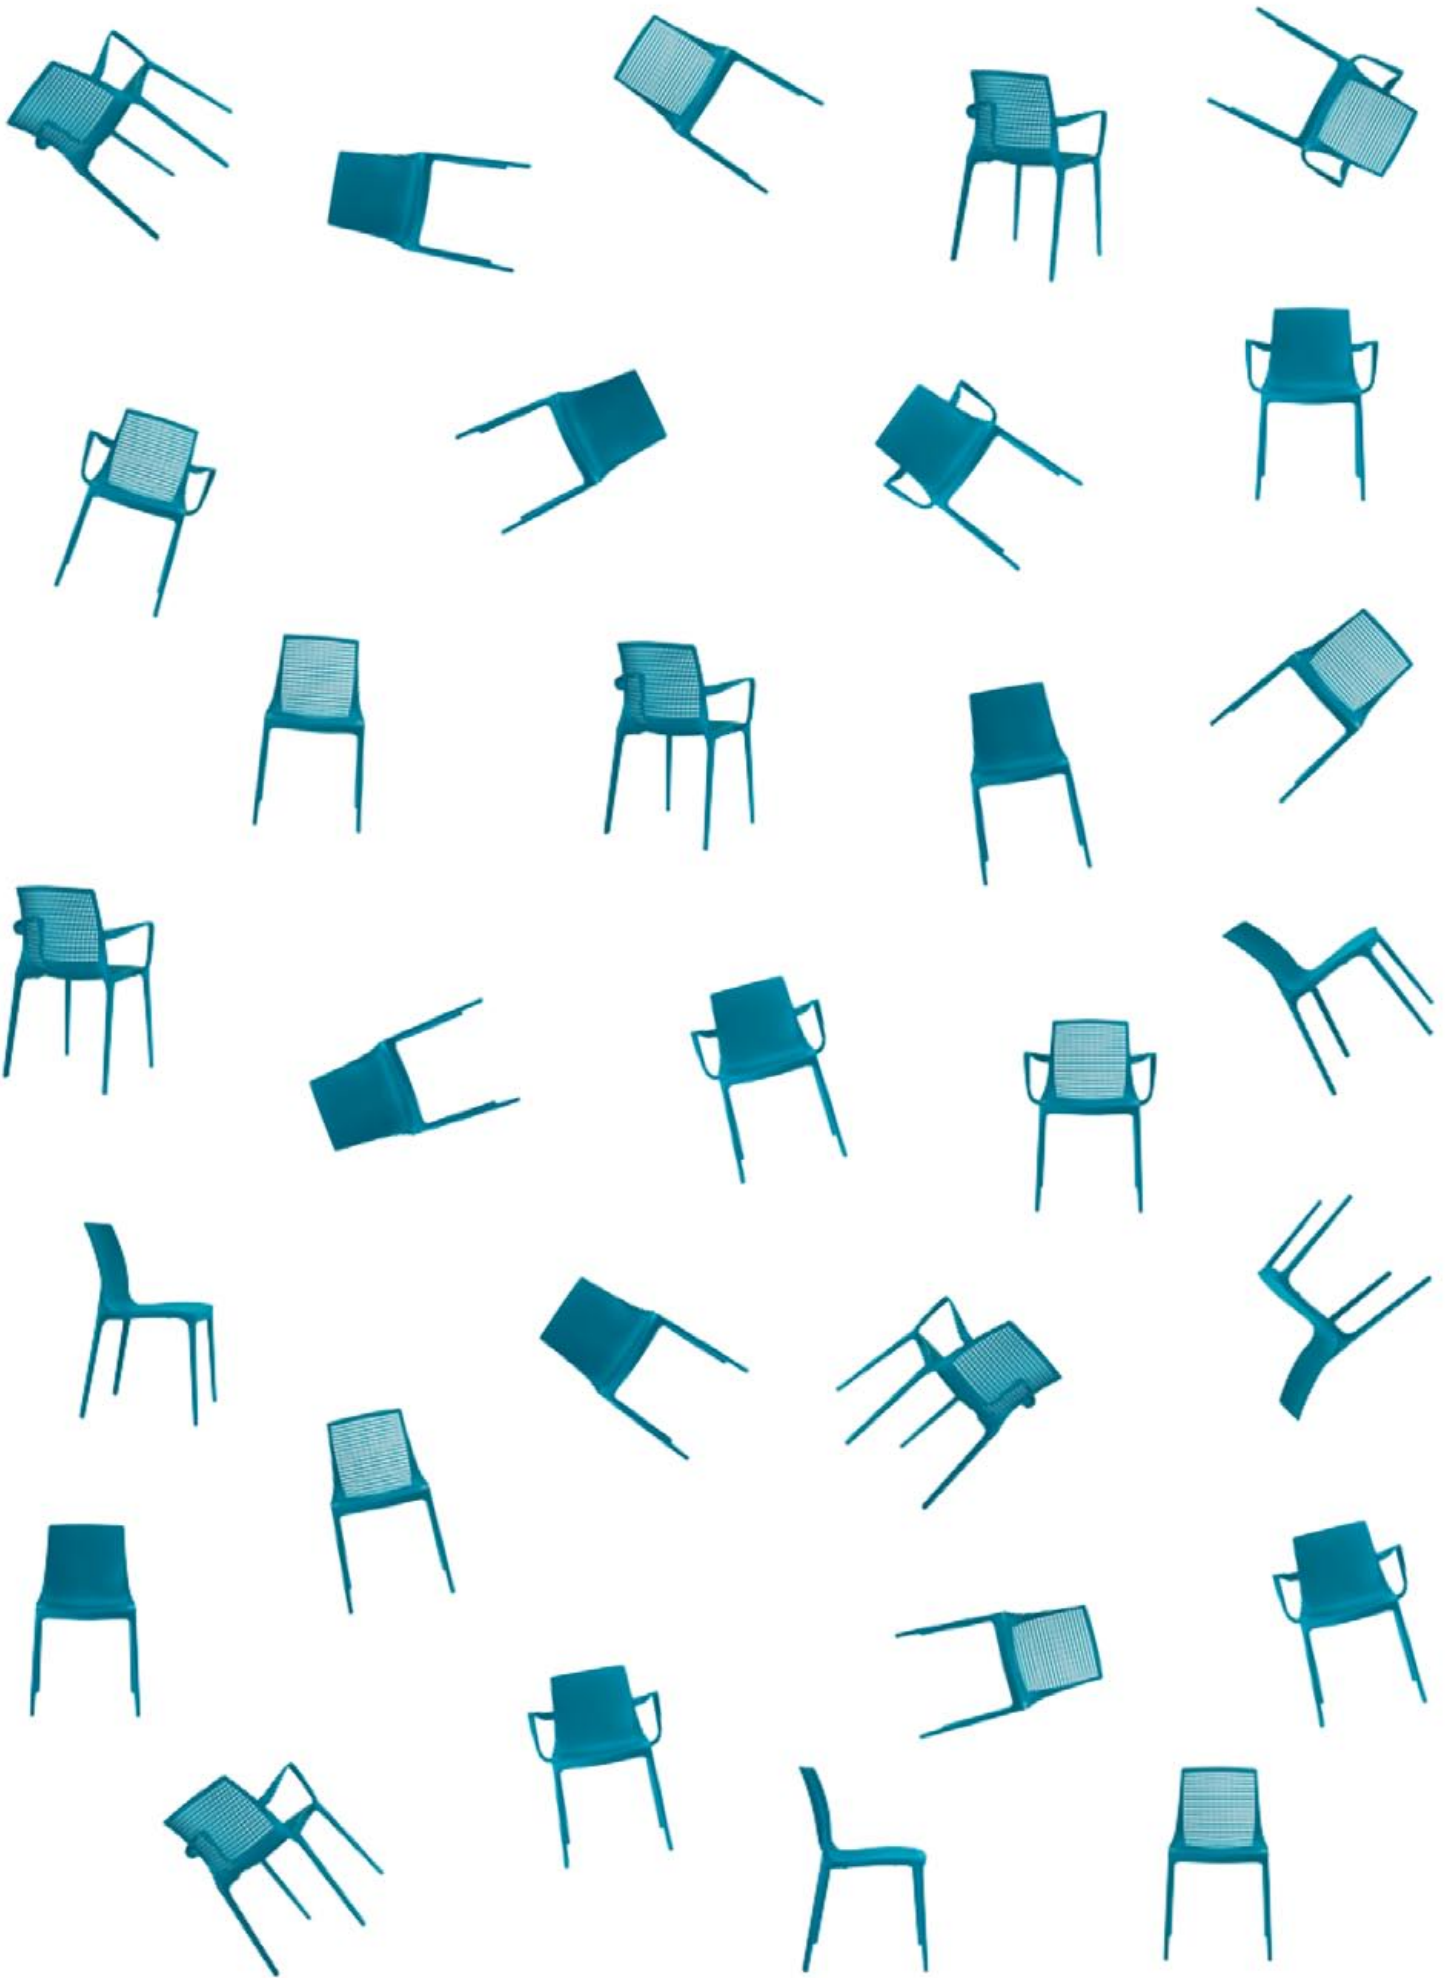

Variety of colour

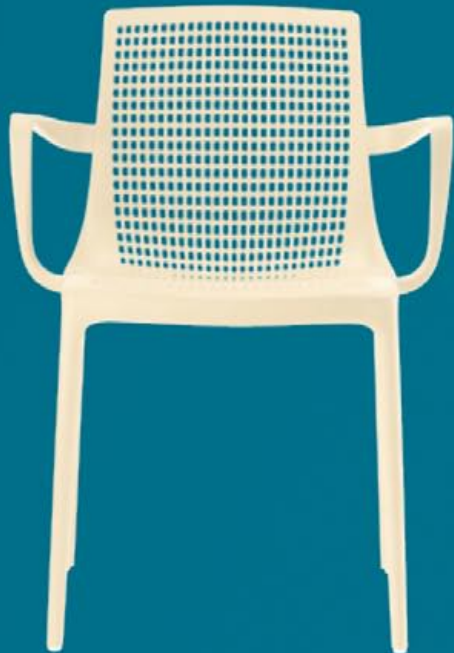

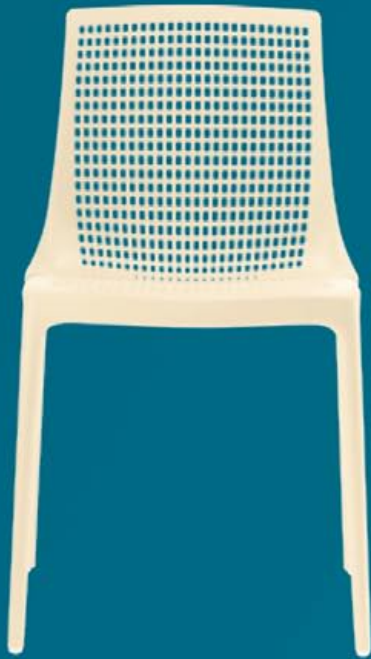

The twin is available in the colours citrus, white, petrol, ruby, sand, lava, apple and stone.

Variety of designs

The twin comes with or without the transparent net structure, as well as with or without armrests.

Lightweight

The lightest twin weighs
no more than 3.4 kg.

The twin world. Four designs each available in eight different colours.
