Applications

Innovative, multi-functional and highly adjustable – in light level and position – the Steelcase Eclipse Light invites everyone to personalize how their desk is lit so they can feel good and be their most productive at work, either virtually or in person. The kickstand supports mobile devices in landscape or portrait and the LED lights illuminate the user reflecting in the copper-tinted mirror.

Mixed presence meetings through remote collaboration is the new normal. As users collaborate remotely, Steelcase Eclipse Light in video or task orientation enhances the user's experience with 14% Flicker-Free technology and superior color performance to make shadows disappear all while reducing eye-strain.
