WorkValet™
Lockers

WorkValet is a locker and storage solution for the hybrid workplace, giving people a convenient and secure place to store personal belongings as they transition through the workday.

Applications

Bay

A bay provides a warm welcome as people come into the hybrid workplace. Typically planned near the entrance of the building, a bay has a high quantity of lockers with a variety of locker sizes.

Boundary

A border provides storage and space division within a hybrid neighborhood. Planned near workstations within a team space, it is primarily for individual use within a team space.

Hub

The hub is a great addition to in-between spaces. Typically planned with ample space around the hub, it welcomes people to gather around it's worksurface to socialize or collaborate.
