Personal wellbeing workspaces

<https://kabin.space>

Welcome to Kabin

We create private workspace solutions of premium quality, designed for human wellbeing and focus, to maximise personal productivity.

Designed for productivity

When employees have the right environment, productivity follows. Kabin provides users choice, efficiency, and focus — helping teams save time and work at their best.

80%

80% of executives believe that personalised, employee-centric experiences help attract and retain top talent, which is critical in today's competitive labour market.

↑ Deloitte's Human Capital Trends Report, 2021

Privacy you can trust

Open and glass-walled booths leave sensitive information exposed, leading to constant vigilance and reduced focus. Kabin's forward-facing design enhances data privacy, creating a secure, distraction-free space where confidential work stays confidential.

23%

Workplaces without adequate private space could see up to a 23% reduction in performance and productivity.

Employees who have access to personal and quiet spaces are more likely to thrive.

↑ Gensler U.S. Workplace Survey, 2019

kabin

A space for everyone

Designed for inclusivity

Everyone deserves a workspace where they feel comfortable, focused, and in control. Kabin provides a private, adaptable environment that supports diverse needs—whether for deep thinking, creative work, or vital conversations.

A sanctuary for wellbeing

With thoughtful design and user-controlled settings, Kabin creates a personal retreat within any workplace. By prioritizing privacy, comfort, and accessibility, it fosters an inclusive space where everyone can do their best work

19%

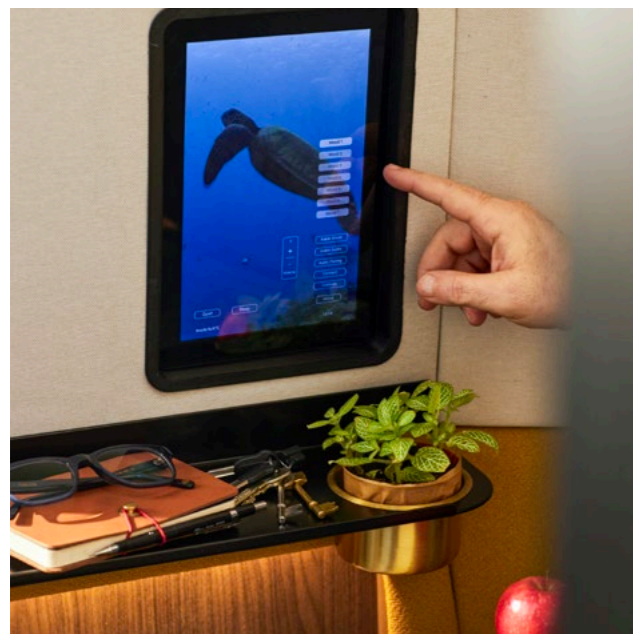

Diverse teams are more innovative and reports show a **19% increase** in innovation revenue for companies with above-average diversity.

↑ Boston Consulting Group, 2020

Smart design, real results

With advanced touchscreen controls, Kabin redefines the single-person workspace — enhancing focus, privacy, and comfort like never before. Designed for high-performance commercial and hospitality spaces, it's the ultimate tech-enabled sanctuary for uninterrupted work.

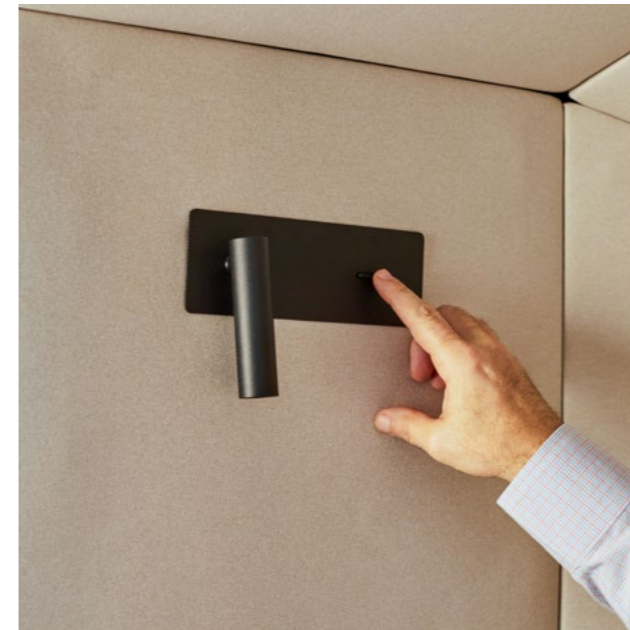

Intelligent touchscreen control

Kabin is the only workspace with a touchscreen interface, allowing full control over air, light, and music via Bluetooth. Choose from immersive sound and videoscapes like forest, ocean or café for a workspace that adapts to you.

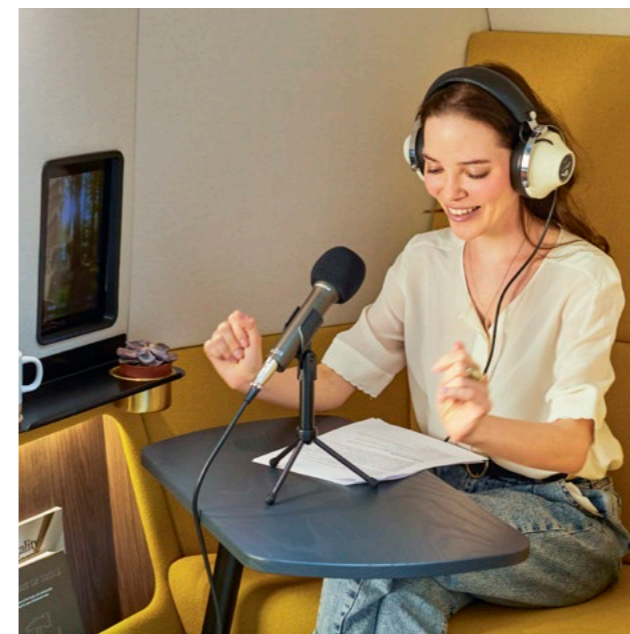

Designed for comfort

Kabin's fully ergonomic seating offers superior support and freedom to move, while soft acoustically rated panels, tactile fabrics, and calming colors create a serene space for extended focus and productivity.

Perfect lighting, your way

Adjustable under-seat and accent lighting create a calming atmosphere, while a wall-mounted reading lamp provides task-specific illumination. Easily control brightness and mood with Kabin's exclusive touchscreen interface.

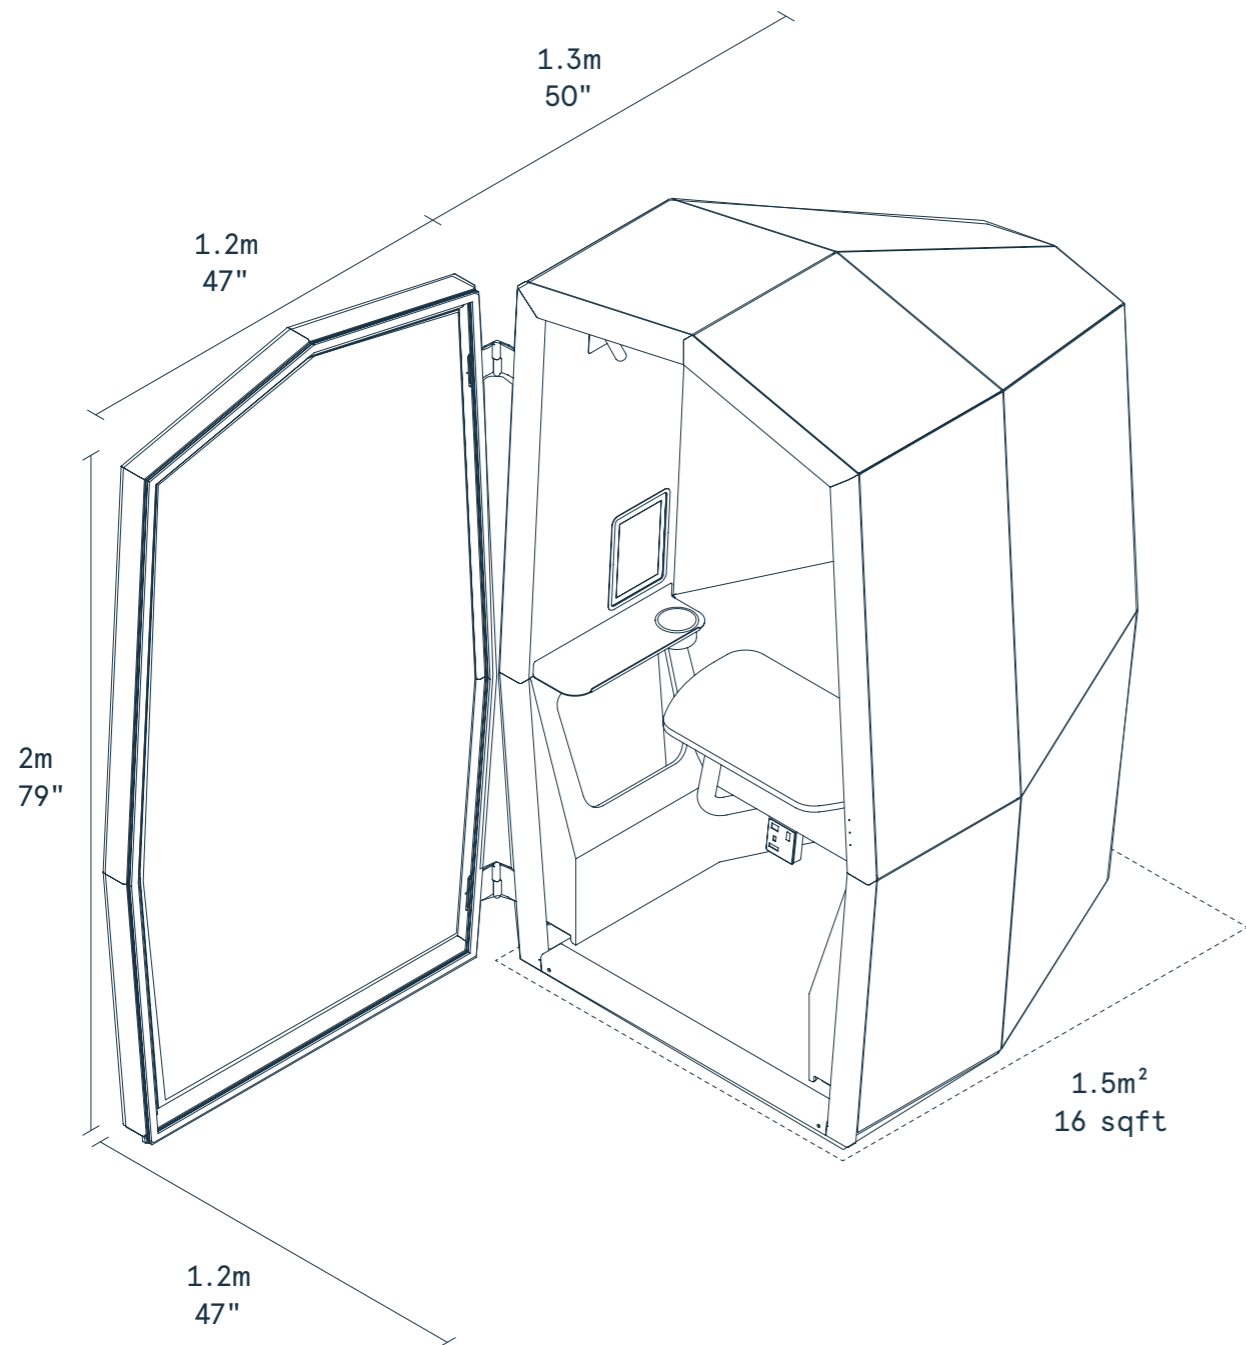

The command position

Kabin's forward-facing design minimizes distractions, eliminating sideways scanning and unwanted glances. This positioning enhances privacy, promotes deeper focus, and creates a personal refuge for truly productive work.

The right environment.
More choice.
Greater productivity.
